Try The Music Studio

Business management software for people who teach music and run a studio: families, students, lessons, invoices and the money, in one place on your own computer. This demo opens a made-up studio you can explore without typing in anything real.

You need

A Windows 10 or 11 computer and about ten minutes.

No account

Once it is installed it works without the internet. Nothing is sent anywhere.

Watch first

The short video on www.jlsmusic.co.za/music-studio.html shows what is inside.

1 Install it

Open the file you downloaded, The-Music-Studio-Demo-Setup. It installs by itself, puts a shortcut called **The Music Studio Demo** on your desktop and opens the program.

> If Windows shows a blue box that says "Windows protected your PC": click **More info**, then **Run anyway**. It appears because the program is new and does not yet carry a publisher certificate.

2 It opens the practice studio

After a short opening screen you are in **Demo Music Studio**, a made-up studio full of families, teachers, lessons and invoices. The bar at the top that says **DEMO** reminds you that none of it is real.

3 Follow the short jobs

The demo opens on **Learn the software**: 22 short jobs that cover running a whole studio. Press **Take me there** on any job and tick it off when you have tried it. The second guide, **A ten-minute tour**, picks the six best ones.

! Good to know

- Click, change and delete freely. **Nothing is kept when you close the program**: it opens the same practice studio every time.
- **Start the demo again**, in the bar at the top, puts everything back the way it was.
- Invoices, statements and letters you make in the demo are stamped **DEMO** on every page. They are for looking at, not for sending.
- This is the demo copy. It cannot be used to run your own studio. The full program, for your own studio, is at www.jlsmusic.co.za/music-studio.html

15% off for the first five people who downloaded the demo from the website, when they buy The Music Studio. The website told you if you are one of them.
